Build'n'Read
Professor Poop

Build Ranger Bob,
his 'grabber stick'
and find the two
monkeys and
the banana.

Welcome to the LEGO City Monkey Park.

Meet Bob. He is a Professor of Poop.

What is a Professor of Poop, you ask?

Bob is searching for poop in the jungle and then tests it in his lab.

Poop is a great way to see where animals have been, what they are eating and how well they are.

Hi, I am Bob.
I am a Professor of Poop

It is a hot, sunny day at the LEGO City Monkey Park.

Bob is search for monkey poop today.

Monkey poop is pretty stinky, so it's quite easy to find if you are standing near it – or in it!!!

But it's not *that* easy. Bob has to search all of the jungle to find the poop and he's going to need some help

How can Bob search the entire jungle for poop?
What could he use?

Build the drone and
find the remote
control to drive
the drone.

Take the drone out for a test flight using the remote control.

If there is one thing Bob has learnt about looking for monkey poop, it's that there are always monkeys nearby.

If Bob can find a place where monkeys live, then he has a good chance of finding some poop.

Bob flies his drone into the jungle to search.

Build the tree and
place a poop by
the tree trunk.

Bob's drone soon finds a tree in the jungle.
And what is that underneath it?

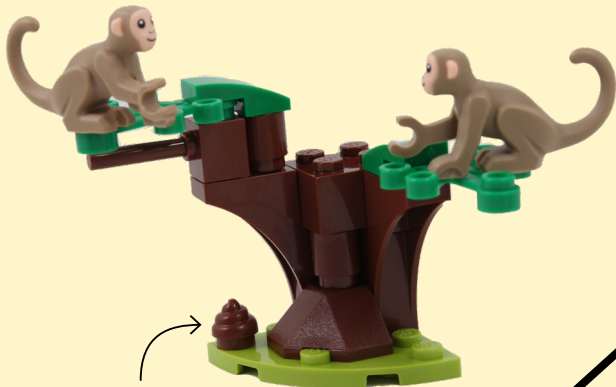

Yes, that's right. A beautiful monkey poop.

Well, Bob thinks it's beautiful but then he is a Professor of Poop after all...

Now Bob needs to get to the tree to scoop the poop and take it back to the lab.

Luckily he has just the tool for the job – the Pooper Scooper 3000, but...

How will Bob get all the way out to the tree with his Pooper Scooper 3000?

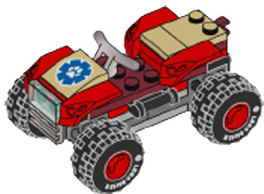

Beautiful poop

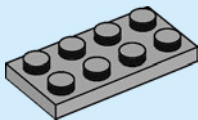

Pooper Scooper 3000

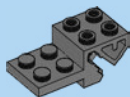

Build the ATV and place the
Pooper Scooper 3000 stick on
the back rack.

Don't forget to put the Pooper Scooper 3000 on the rack!

Now drive Bob out to the tree across the mountains and flowing rivers.

Bob arrives at the tree pretty quickly – his ATV is fast!

He sees his drone has landed right by the poop but he would have found it anyway – that poop is super stinky!

In fact, the poop is so stinky, he can't get close enough to scoop it!

**How could Bob scoop the poop onto his
ATV without getting too close to it?**

Could Bob use the wind from
the rotors to blow the poop
onto the ATV?

Could Bob use the grabber tool to scoop the poop onto the ATV?

Could Bob break off a branch from the tree and use it to whack the poop onto the ATV?

Bob is very happy with how he scooped the poop.

But what Bob hasn't seen are the two cheeky monkeys behind him. They jump on Bob's ATV and start driving around the trees, jumping over hills and making donuts.

Wow, his ATV is fast!

'Aargh,' screams Bob. ' The monkeys have stolen my ATV. How am I going to get it back?'

How will Bob get the ATV back from the cheeky monkeys?

Could Bob grab a banana and start acting like a cheeky monkey, tricking the other monkeys into letting him jump on the ATV and take control?

Could Bob use the remote to control the drone to the ATV and shut off the engine, to stop the vehicle?

Could Bob attach the banana to the drone and trick the monkeys to drive back to Bob?

Bob is successful in getting back his ATV and drives his beautiful poop back to base.

After arriving back at the lab, Bob tests the poop to see if he can find out what the monkeys have been eating.

But we're guessing you already know what food that is...!

Can you build Bob's
poop table with
your bricks?
